## What's New In 2Browse?

2Browse is a lightweight application designed to act as a web browser as well as a file explorer so that you can quickly access your favorite sites as well as the local files on your computer. Comes with an outdated and rugged interface The application does not require any setup and you can surf the Internet or access various files, administrative tools or other components on your computer as soon as you download it to your computer. Upon launch, you are welcomed by the home page that contains several links that enable you to access the Internet or local files. It is worth mentioning that the home page was built for the purpose of troubleshooting and security in mind and hence, it includes links for antivirus, anti-malware and other computer protection tools in mind. It is worth mentioning that you can also access other useful local resources from the main pages, including Libraries, User profile, Control Panel and the Settings. Consequentially, if you are having a difficult time finding installed programs or running them, the app can lend you a hand. Can act as a file explorer and minimalistic browser The highlight of the application stems from the fact that it is packed as a single solution for both web browsing and file exploring. Since the app is built as an ActiveX control, you will be happy to learn that you can take advantage of a similar functionality as Windows Explorer. As a web browser, the app allows you to access a few search engines or you can enter your keyword in the dedicated address bar and hit the Enter key. On a side note, in case you select otherwise or add a direct URL link, the searches are automatically performed on Google. Then again, the app also includes direct links to Bing, Yahoo and Wikipedia. A multipurpose tool for exploring files and browsing the net in the eventuality that you have an older computer with limited resources that cannot respond efficiently to the high demands of modern web browsers or advanced file explorers, then perhaps 2Browse could come in handy.
